

RAVI KUMAR

Data Analyst | Business Intelligence | Power BI Developer

Delhi, India • +91-8826224738 • itsravikumar8826@gmail.com • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Results-driven Data Analyst with hands-on experience in SQL, Python, and Power BI for end-to-end data analysis, visualization, and business intelligence reporting. Proven ability to transform raw datasets into actionable insights through EDA, KPI tracking, trend analysis, and interactive dashboards. Skilled in Advanced Excel (VLOOKUP, XLOOKUP, Pivot Tables), DAX, and Python (Pandas, NumPy, Matplotlib) to support data-driven decision-making across cross-functional teams.

CORE SKILLS

Data Analysis & Visualization: SQL, Python (Pandas, NumPy, Matplotlib), Power BI, DAX

Advanced Excel: VLOOKUP, XLOOKUP, Pivot Tables, SUMIFS, Power Query, LAMBDA

KPI Reporting & Dashboards: Power BI, Looker Studio, Excel Dashboards, DAX Measures

Statistical Analysis: EDA, Trend Analysis, Time-Series, Outlier Detection

Data Cleaning & Validation: Data Quality Checks, Anomaly Detection, Data Governance

Reporting Automation: Automated Daily/Weekly/Monthly Reporting Pipelines

BI & Insights: Star-Schema Modeling, Business Intelligence, Actionable Insights

Tools & Collaboration: Google Sheets, Cross-functional Reporting, Stakeholder Presentations

WORK EXPERIENCE

MIS Executive | CollegeDunia

Nov 2025 – Present | Delhi, India

- Analyzed operational data daily using Advanced Excel (VLOOKUP, XLOOKUP, Pivot Tables) and SQL to identify errors, inconsistencies, and outliers — delivering accurate, insight-driven reports for leadership.
- Built interactive KPI dashboards in Power BI and Looker Studio using DAX measures — providing real-time visibility into operational performance and enabling data-driven decision-making.
- Automated daily, weekly, and monthly MIS reports using Power Query and Google Sheets — reducing manual reporting effort by ~40% and ensuring on-time delivery of actionable insights.
- Performed time-series trend analysis and data visualization to identify performance patterns and surface actionable recommendations for cross-functional teams.
- Built consolidated data models using Power Query and Power Pivot, merging multi-source datasets into a single reporting layer for consistent, reliable analytics.
- Conducted end-to-end data cleaning, validation, and EDA across multiple datasets — ensuring data accuracy and compliance with organizational reporting standards.
- Collaborated with cross-functional teams to align dashboard outputs with business objectives and present data findings and visualization insights to stakeholders.

Data Analytics Intern | Unified Mentor Pvt. Ltd.

Sep 2025 – Dec 2025 | Remote

- Cleaned, validated, and statistically analyzed raw business datasets using Excel, Python (Pandas, NumPy), and SQL — ensuring data accuracy and compliance before reporting.
- Identified data inconsistencies and outliers through EDA and implemented corrective measures to maintain dataset integrity and reliability.
- Built business insight reports in Power BI and Excel, surfacing actionable recommendations that supported data-driven operational decisions.

KEY PROJECTS

Pizza Sales Analytics Dashboard | SQL, Excel, Power BI, Python, DAX | [GitHub](#)

- Designed an end-to-end Power BI dashboard analyzing 49,570+ transactions across 12 months using a star-schema data model in SQL and Excel — DAX measures for Total Revenue (₹817.86K), Avg Order Value (₹38.31), and category-wise KPI tracking.
- Performed time-series trend analysis and product performance segmentation to identify peak demand (July: ₹72.6K, Fridays: 3.5K orders) — delivering actionable pricing and inventory optimization insights.

- Applied Python (Pandas, Matplotlib) for data cleaning, outlier detection, and EDA before loading into Power BI — ensuring data accuracy across all visualizations.

Superstore Sales & Profit Analytics Dashboard | *Power BI, DAX, SQL, Excel* | [GitHub](#)

- Designed an end-to-end Power BI dashboard analyzing 9,994 orders across 3 regions and 4 product categories — full data validation and cleansing in SQL and Excel prior to loading.
- Authored DAX measures for YoY Sales Growth, Profit Margin %, and Discount Impact Score — delivering actionable insights for pricing strategy and operational decision-making.
- Conducted data quality checks and anomaly detection across multi-source datasets to ensure reporting accuracy and compliance before dashboard deployment.

Student Social Media Addiction Analysis | *Python, Pandas, Matplotlib, NumPy* | [GitHub](#)

- Analyzed 700+ student records using EDA to study behavioral patterns, addiction scores, and sleep impact — identifying and resolving data errors and outliers for data integrity.
- Built an automated risk-classification model generating personalized, data-driven recommendations based on individual usage patterns — end-to-end Python data pipeline.
- Documented complete analysis workflow to support reproducible, audit-ready analysis aligned with data quality and process compliance standards.

EDUCATION

Bachelor of Business Administration (BBA) — Marketing

2021 – 2024

IIMT College of Management, Greater Noida

CERTIFICATIONS

- Microsoft Power BI Data Analyst Associate — Microsoft
- Microsoft Office Specialist Certificate — Microsoft
- Career24/7 Data Analytics — IBM & NASSCOM Professional Certification
- SQL for Data Science — Coursera
- Python for Data Science — Coursera

ADDITIONAL HIGHLIGHTS

- Strong expertise in data analysis, visualization, and KPI reporting — delivering business insights through clean dashboards and structured analytical reports.
- Proficient in Advanced Excel (VLOOKUP, XLOOKUP, Pivot Tables, Power Query) and SQL for data extraction, transformation, and analysis.
- Continuously building skills in Python (Pandas, Matplotlib), Power BI DAX, and statistical analysis to deliver deeper analytical insights.
- Skilled at data storytelling — communicates complex findings through interactive visualizations and structured reports for both technical and non-technical stakeholders.
